Heavy duty K-type Thermo probe

- **Ideal for puncture and surface measurements**
- **First-class thermocouple probe**
- **1 meter non-curled cable**
- **Robust spring-loaded band steel head**
- **Quick Response Probe Type K**
- **Made in Great Britain**
- **Including 12-month traceable calibration certificate**

DESCRIPTION

Robust, straight surface temperature sensor. A spring-loaded band steel thermocouple, protected by a stainless steel cylinder, ensures a fast response and low heat loss. Ideal for measuring the temperature of small or large stationary surfaces. The response time is less than 1 second. Maximum sensor temperature 650 °C.

TECHNICAL DATA

Measurement specifications

Output	K type minature flat-pin plug
Measuring range	Temperature -75.0 ... 650.0 °C
Accuracy	BS EN 60584-1:2013 ±1.5°C or better
Cable length	1 meter non-curled
